Low Temperatre Unit

10kW Fan Coil

ABOUT THE AIR HANDLER

Cool Energy's 10kW Low Temperature fan coil is a flexible twin fan unit capable of offering 6,480m³/hr airflow. The unit requires a water source to the integral coil and has quick-release water connections, together with a 16amp 3-phase power connection.

The air handler is sited internally and can be supplied with or without an independent low temperature defrost panel to offer a nominal 0°C air off temperature, capable of offering stability to a 4°C room or below.

The unit is also supplied with a condensate hose, real timer defrost control panel (to manage both coil and condensate tray heater element defrost), together with optional warehouse stands built to order.
