

## 45kW - 1,290kW Water Cooled Chiller Rental Range

Cool Energy's new water cooled rental chillers, which provide reduced footprints, lower power usage and are all Eurovent certified, are part of a 5 model range capable of offering cooling up to 1,290kW from one single chiller unit.

### Chiller Features

The chillers can be provided with suitably-rated circulation pumps and flexible connection hoses/flanges as part of the overall package supplied.

The units can also be supplied with ferrous or non-ferrous circuits and rental cooling towers.

The chillers have been designed to help provide cooling for the following uses:

- HVAC/Building service breakdowns
- R&D testing for long or short term trials
- Plastics and Rubber production
- Food storage and packaging
- Laser applications
- Jacketed vessels and tank cooling
- Air compressor cooling
