

45kW - 145kW Rental Heat Pump Chiller Range

Cool Energy can provide a range of 3 Heat Pump chillers, capable of offering cooling and heating from one single source.

This new range of chillers, which also offer low power usage and internal circulation pumps and thermal buffer tanks can provide cooling down to -10°C and heating up to 45°C.

Chiller Features

The units can be supplied with ferrous or non-ferrous (food safe) circuits, together with a wide range of connecting valves and hoses to help connect on to customers specific systems.

Warm Air

The chillers can also supply fan coils, air handling units and radiators with warm water to provide heating to offices, buildings and temporary events.
