

+80°C Water for Rent

Cool Energy now offer a complete range of hot water and warm air units offering a wide range of temperatures to directly heat workspaces and provide temporary units for boiler breakdowns.

The hot water generators and warm air heaters, which are the latest addition to **Cool Energy's** fleet of equipment, are **British-built** and have a heating duty range of **3-550kW from one single unit** to help manage small and large applications.

Cool Energy's latest range of Hot Water Generators capable of offering 80°C water leaving temperatures

Home-Grown Heating Expertise

The Company's in-house manufacturing company – **Tricool Thermal** ([click here to link to site](#)), designed and built the water heaters from their Totton base near Southampton, which have been developed in conjunction with several European customers who specialise in heating products and installations. **Cool Energy** are also providing a wide range of ancillary products to help compliment the installation of the hot water and hot air units, including suitably rated high temperature pumps, hoses, ducting and banded fuel tanks where required.

Warm air heating for office and working areas is available on a same or next day basis.

Unique Rental Service

Russell Wilson, Cool Energy's Rental Director (pictured above) explained his company's latest product, "For the past two years we have been providing a limited supply to specific customers in order to road test our units in various industrial projects and latterly within commercial buildings.

"Customers' applications vary from site to site and they look for their suppliers and partners to provide a range of products to meet whatever emergency, shortfall or bottleneck. This range of rental products has now been proven and is ready to match the demands of our customers either on a breakdown basis or pre-planned maintenance program.

"We plan to expand this service throughout our European network".

Wide Coverage and Product Range

Cool Energy, who operate throughout the UK, Ireland and Europe offer a wide range of cooling and heating rental plant, including chillers and heaters as small as **1kW** all the way through to **1,500kW** water and air-cooled single chiller units, air blast coolers, cooling towers, air handling units, fan coils, boilers, heaters and air conditioners on a same or next day basis.

They also supply bespoke installations alongside the supply of flexible water hoses, pipework connections, heat exchangers and power generators.

All of this is supplied with 24/7 maintenance throughout the rental period. There is also an option to purchase the equipment when the rental project has been completed.

Call free on **0800 840 4210** for an emergency visit or to order equipment fast, alternatively visit us at www.coolenergy.co.uk
