

Brand New Cooling Tower Delivery

Cool Energy has accepted delivery for 3 off 2,000kW rental cooling towers for 2 planned UK projects.

The cooling towers, which are the latest addition to Cool Energy's fleet of cooling equipment, have been developed in conjunction with world-leader Evapco, who were instrumental in developing the towers to fully meet UK legislation.

Cooling tower, developed in conjunction with Evapco

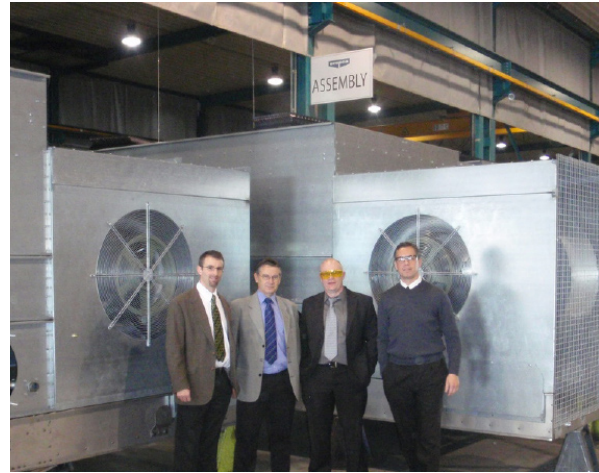

Specialist Service

Russell Wilson, Cool Energy's Rental Director explained his company's latest investment, "We have several customers who operate large production processes and demand a wide range of products to help meet their sites energy-reduction, and expect us to provide these with our refrigeration plant.

By providing the latest CLASS A water-cooled equipment and cooling towers to suit, we can demonstrate a tangible power saving for our clients of some 20%, and deliver new equipment to site for long-term commitment.

These towers will provide this and we will continue to grow our business here in the UK and also through our European network, who were instrumental in developing our prototypes.

Evapco are a world-leader, and we plan to promote this together for the benefit of our industry, as we are both refrigeration specialists."
