

Emergency Winter Cooling

Winter's here and with freezing weather conditions forecasted, the risk of frozen cooling equipment increases and the inevitable knock-on effect to process production and critical HVAC plant.

Throughout this period, Cool Energy offer specialist emergency cover to the whole of the UK and especially customers who experience equipment failure on site.

We guarantee a **same day response** and **visit to site** by our team of mobile application engineers to ensure customers know exactly what we can do to help and also solve any technical/bespoke needs on site.

Logistically we also offer a **timed delivery** for equipment arriving to site with the added service of an installation team if needed to help safely manage the changeover.

Fast Emergency Response

Russell Wilson, Cool Energy's Rental Director explained, "We are aware that some of our customers need a faster response to their breakdowns and someone capable of managing their emergency on site to avoid any loss to their business.

Freeze Damage - Chiller Rental

In the winter, this can involve **Chiller Evaporators, Dry Air Coolers, Air Blast Coolers** and **Air Handling Equipment** exposed to extreme cold periods – sometimes over the weekend when equipment is unused.

Applications can vary from air conditioning failure in a data storage suite to a component fault on cooling equipment in a manufacturing plant.

All downtime is expensive and has a knock-on effect throughout the business and we are acutely aware of the impact. That is why we are finely tuning our service package and operation to the needs of our customers in Winter," stated Wilson.

Wide Coverage and Product Range

Cool Energy operate throughout the UK, Ireland and Europe offer a wide range of cooling and heating rental plant, including chillers as small as **1kW** all the way through to **1,000kW** single units, air blast coolers, cooling towers, air handling units, fan coils, boilers, heaters and air conditioners on a same or next day basis.

Bespoke installations teams are offered along with the supply of flexible water hoses, pipework connections, heat exchangers and power generators.

All of this is supplied with 24/7 maintenance throughout the rental period.

Call us free on **0800 840 4210** for an emergency visit or to order equipment fast.
