Temporary Walk-in Coldstores

# Flexible Rental Solutions

## Chilled & Frozen storage – inside and out

Cool Energy are refrigeration specialists providing a range of flexible buildings and containers to suit your specific site requirements.

### Externally

We have a range of chilled, frozen, tempering and ambient **temperature controlled** cold stores from as small as a 4 pallets all the way through to 58 pallet mega unit, and then multiple of these joined together.

Flexible Storage Options

We specialise in **blast freezing and chilling** and can assist your engineers and production managers in selecting the most efficient units to manage their exact needs.

In addition to this, Cool Energy supply large **temporary insulated structures**, which are temperature controlled and can measure up to 100m in length and 60m width. These are supplied on a temporary basis to provide more chilled space on site or for longer periods should you be waiting for planning permission, or require additional space.

All equipment is supplied with 24/7 maintenance throughout the rental period.

Modular Walk-in Coldstores

### Internally

Do you need to cool a room fast or have a breakdown on your existing DX or central cooling system?

**No problem.** We can respond very fast and deliver to you fast with equipment tailor-made to meet the specification of your duty on site. We also provide food-grade and biodegradable glycols for all applications to meet every HSE control.

**Need a modular chill store in your production or storage area on a temporary basis?**

Cool Energy can provide cold stores with a choice of wall thickness, doors and floors to match your space on site. Why buy a store when you may need to expand it in the future or need to change the orientation later in the year? We are flexible and can change the store you rent from us in to what you need and when.

### Applications we manage:

- **Compressor failure on DX systems** – we by-pass this and cool independently, whilst you are free to repair your existing kit.
- **Low Capacity** – we provide additional kit during increased production periods and NPD uplift in business.
- **Seasonal shortfalls** – we can supply short-term capacity.
- **Refurbishments** – during outages or maintenance we can provide equipment.
- **Breakdown** – we can supply the same day when production is affected.
- **Ambient Stores** – we can provide a total system to convert a space into a chill store.

# Production, Packing and Storage

We can help you to maintain the correct temperature.

## Help when you need it

When you are faced with your products, packaged stock or personnel overheating you can do something about it – call Cool Energy who are refrigeration and air movement rental specialists.

## Experience counts

We're experts in providing cooling equipment and air distribution in production areas, ingredient stores, packing areas, storage units and where there are hot spots involving personnel such as canteens and production lines.

Our job is to provide you with a solution to meet the demands of your business and have wide experience in managing these applications.

## Fast Response

We can visit you or your client on either the same or next day; our engineers are nationwide and experienced in recommending the most resilient and economic answer to your shortfall.

We can then provide you with express delivery, installation and commissioning service to meet the demands of your particular site and it's timetable.

**Our products can be sited in the following manner:**

- Placed in existing racking
- Secured to the ceiling
- Placed internally with temporary air distribution
- Free standing in areas with or without stands
- Sited externally and feeding existing air distribution
- Sited externally with ducting and air distribution

## Our Rental Range

- Packaged chillers from 1kW – 1,000kW units
- Air handling units capable of +25 °C to – 10 °C air off temperature
- Free standing industrial fans
- Fan coils for offices and canteen cooling
- Air conditioning units for offices and personnel areas
- Industrial Evaporative coolers
- Dehumidifiers to help regulate the air moisture content

## Typical Application

- Tempering of meat products from frozen to chilled
- Converting an ambient store to a chilled area
- Spot cooling single pallets and racks
- Cooling a conveyor belt of products
- Tablet storage to +/- 1 °C temperature tolerances
- Build temporary chill store for additional space on site

All of this is supplied with 24/7 maintenance throughout the rental period.
