

Frozen Evaporator or Cooling Coil?

Winter's here and with the on set of short periods of freezing weather customers are exposed to the risk of frozen equipment and the likelihood of production downtime or the loss of cooling for their HVAC plant.

Cool Energy offer specialist breakdown cover throughout the whole of the UK to it's customers who have frozen chiller evaporators or cooling coils on site.

A same day response and visit to site by one of it's team of mobile application engineers is available for all customers along with the guarantee of a **timed delivery** of equipment to site with an installation team to help safely manage the breakdown.

Fast Emergency Response

Russell Wilson, Cool Energy's Rental Director explained, "We are aware that some of our customers need a faster response to their breakdowns and someone on site capable of managing their emergency to avoid any loss to their business.

Temporary Cooling - Fast.

In the winter, this can involve **Chiller Evaporators, Dry Air Coolers** and **Air Handling Equipment** exposed to extreme cold periods – sometimes over the weekend when equipment is unused. Applications can be varied from air conditioning failure in a data storage suite to a component fault on cooling plant in a manufacturing plant.

All downtime is expensive and has a knock-on effect throughout the business and we are acutely aware of the impact. That is why we are finely tuning our service package and operation to the needs of our customers in Winter," stated Wilson.

Wide Coverage and Product Range

Cool Energy, who operate throughout the UK, Ireland and Europe offer a wide range of cooling and heating rental plant, including chillers as small as **1kW** all the way through to **1,000kW** single units, air blast coolers, cooling towers, air handling units, fan coils, boilers, heaters and air conditioners on a same or next day basis.

Same day delivery available

HVAC or Process Equipment

They also supply bespoke installations alongside the supply of flexible water hoses, pipework connections, heat exchangers and power generators.

24/7 maintenance throughout the rental period

All of this is supplied with 24/7 maintenance throughout the rental period. There is also an option to purchase the equipment when you have completed your rental project.

Call us free on **0800 169 3861** for an emergency visit or to order equipment fast.
