

Cool Energy Awarded with ISO14001

We are pleased to announce that Cool Energy has successfully been awarded ISO 14001:2004 throughout its UK depot network.

Environmental Management

The company's Environmental Management System, which was audited by specialist ISOQAR, manages all aspects of manufacturing, design, installation, sales and service incorporated within Cool Energy's business, and was conducted over a 6 day assessment period in August.

Russell Wilson, Cool Energy Director commented, "We are very pleased to have been awarded ISO14001 for our business as it gives our customers a clear indication that we are managing our business to a set standard and we have environmental controls and processes to deliver this."

It is our firm intention to develop our business in tandem with our quality and environmental management systems and to ensure that we maintain this throughout all areas of our operation. Our staff benefit by having a set standard to work with and a say in the future development of our service.

The Cool Energy Head Office, Totton, Southampton.

We want our customers to know that we are continually assessing our business and will be measuring our standards and improvements.

From time to time, we also invite our customers to tell us personally what they think of us, as we continually strive to improve.

Cool Energy Europe Wide

Cool Energy, who also operate throughout Europe, rent air and water-cooled chillers, air blast coolers, air handling units, fan coils and air conditioners throughout the UK and Europe.

They also install their equipment where needed and supply flexible water hoses, pipework connections, heat exchangers, power cable and generators.

All Cool Energy rentals include 24/7 maintenance throughout the project period.
