

Contact Cool Energy on Freephone 0800 840 4210

Cool Energy's PCS (portable cold store) range provides the very latest in 3 pallet wide temperature controlled holding storage.

• Cold Store Design and Insulation

One-piece joint free vacuum pressed GRP panels, with high performance 100mm CFC free Styrofoam core, not only to give excellent thermal insulation, but ensure the highest level of hygiene. PIR fire rated panels are also available upon request.

• Refrigeration System

The refrigeration unit is integrally housed within the cold store. This offers the best aesthetic appearance and provides the maximum internal load space and noise reduction. The refrigeration provides unprecedented temperature range of between +30°C to -30°C across the whole range.

• Temperature Recorder-optional

We offer optional temperature recorders capable of providing accurate temperature recording whilst complying with all the latest EU directives of temperature monitoring.

Pre-set high and low temperature alarms with push button operation, and the unique in-built Help Facility ensure user-friendly operation. Security protected clock with automatic winter/summer adjustment.

• Lighting

Fluorescent lighting fitted in the ceiling coving provides the unit with above 300 Lux of light suitable for deep-frozen picking applications.

• Health & Safety and Preventative Damage Features

Every cold store unit is fitted with impact step protectors, lockable doors as standard. Emergency lighting, externally mounted audible and visible mantrap and temperature alarms, provide all the necessary safety features.

• Options

Extra height, twin refrigeration & back-up systems, slide doors, ramps, dock level platforms, dual compartments and racking are available as options on every cold store unit.
