

Cool Energy and Rapid Climate Control Announce Trade Partnership

Specialist Chiller Rental provider – Cool Energy, and Portable Cooling & Heating supplier Rapid Climate Control, have joined forces to provide a one-stop-shop for UK & Ireland businesses.

The partnership, which will operate from **10 regional locations**, will supply the largest range of cooling and heating products currently on the market, including rental chillers up to **1,250kW**, air conditioners to **500kW**, through to **1.5kW** portable office climate control units - on one single invoice.

The range of climate control units on offer

Commenting on the announcement, **Russell Wilson – Cool Energy's Rental Director (2nd right)** said, "We are pleased that our customers can now receive a wide range of goods from 2 of the UK's most specialist rental suppliers.

Both businesses are well known for focusing on large and small duty temperature control in buildings, factories and commercial businesses.

We are now able to provide both ranges together all over the **UK and Ireland**, with a faster response, now that we have larger resources and more local locations."

The partnership also have 6 further depots in Europe and have completed several projects recently including temporary cooling for an HVAC building refurbishment, warehouse air conditioning for a national television programme and are currently cooling and heating the central plant of a regional banking group.

Rapid Climate Control's Director (2nd left) – Nick Payne commented, "For some time now we have been working with Cool Energy and it has been apparent that we work well together.

L-R Rapid Directors Paul Reynolds and Nick Payne with Cool Energy's Russell Wilson and Rapid's Bob Eager

Our customers expect a good response and first-class equipment with the latest environmentally-friendly benefits and a good price. Some of our larger, national customers also prefer to buy from one source to reduce administration.

We both buy direct from manufacturers all over the world and are experienced in sourcing the latest, most efficient equipment. We can now offer a larger stocked range to cope with most high ambient summers and the most demanding winters.

By working closely together, our customers will receive the benefits that both our businesses can provide.

We are indeed specialists and our customers constantly ask for this approach to help accurately match their needs and specific application demands.

Dealing with critical projects for businesses is important, for example we overcame a cooling failure at a data centre, and helped overcome a production stoppage due to equipment failure - this is what we do best."

Both companies will be trading at the following locations from **6th April 2009** and can be contacted on the following number **0800 952 2520** free of charge.

Three locations in London at Epsom, Kingsbury and Dagenham. Southampton, Bristol, Birmingham, Manchester, Bradford, Glasgow and Navan near Dublin.
