

Cool Energy HVAC & Process Chiller Rental

CHILLER RENTAL SERVICE

Designed, built and maintained to the highest standards demanded by the UK rental market, Cool Energy chillers can handle a wide range of applications in the most rugged environments.

Their ability to handle applications down to outlet temperatures of -12 °C means that whilst being eminently suitable for standard air conditioning duty, they can also handle many process cooling situations.

Additional Services

- Cool Energy also stock a smaller range of chillers from 1kW - 50kW.
- Cool Energy have special low temperature chillers capable of operating to -30 °C water off.
- Cool Energy offer a wide range of ancillaries available ex-stock to help connect our equipment to your system.
- Cool Energy can offer a wide range of diesel generators to help power our equipment if you are short of power.
- Cool Energy have a wide selection of air handlers, fan coils and portable air conditioners, ex-stock for rental or sale.
