

Did you know...

You can rent chillers just like you do your company cars

CAR

CHILLER

Why buy a piece of cooling equipment when you can rent it?

By renting from Cool Energy your business can achieve the following financial benefits:

- **No capital outlay** - you can retain the cash in your business and earn interest off this or utilise it for a more urgent project.
- **No maintenance charges** - we deliver new equipment to you and provide 24/7 maintenance throughout the rental period from 6 months to 6 years.
- **Your kit won't grow old** - for all 2-6 year rentals we will replace your equipment every 2 years.
- **Flexibility** - want to upgrade your rental chiller after 1 year? No problem, give us 3 months notice.
- **Tax efficiency** - you can offset your monthly rental charges against any future corporation tax payment.
- **Cashflow** - your rental price remains the same throughout your hire period so you can accurately budget your outgoings without any unforeseen charges.
- **Paperwork** - No leasing documents, setting-up costs or searches.

Interested in what we have to offer you and your business? Then please contact us on **0800 840 4210** or info@coolenergy.co.uk Thank you

Our flexible approach to renting Why should you rent?

Rent when you have no capital or want to maintain your cashflow.

Cool Energy are offering a low cost alternative to buying at a time when cashflow is especially important in business and commitment to capital expenditure can be uncertain.

Cool Energy are specialists at providing a wide range of brand new and ex-demo chillers (1kW - 1,000kW units), cooling towers, dry air coolers and air conditioning equipment.

You can choose from the latest Class A energy saving equipment with zero-ozone depleting refrigerants and a choice of compressors to match your application.

This can be provided on a weekly, monthly, annual or longer basis, with a sliding scale of prices to help match your budget.

We also visit, help specify, analyse your operating costs and recommend the most economic and resilient piece of equipment to suit your project.

What are your first steps?

You've nothing to lose by calling us for a quotation. Cool Energy can also visit you and look at your project and current equipment on site.

We can help determine what specifically you require on site or offer you a direct replacement in duty.

Once we have carried out our visit, we then provide you with a **technical summary**, **equipment performance guide** with options and **commercial offer**, to support our analysis of your business requirements.

You will also be offered a wide choice of rental options, which will include full maintenance throughout the rental period and simple accounting on an agreed basis.

This can be carried out quickly as we offer a truly nationwide engineer network from our regional offices based in **London, Southampton, Bristol, Birmingham, Bradford, Blackpool, Glasgow and Dublin.**

You will then have an accurate assessment of what Cool Energy Rentals can offer you when you make your decision.

Maintenance included - Cool Energy provide a 24/7 service throughout the rental period.

Lose no capital value Enjoy tax relief on rental

Rental gives you a tangible financial option

There are several reasons why Cool Energy customers rent and why they choose not to purchase:

- Rental is tax efficient and appears off the Balance Sheet. It could even reduce your tax and corporation tax liabilities.

When you rent you are not buying a piece of equipment that could become obsolete in the future. We can upgrade your rental after the agreed end date and replace it with a newer piece of equipment should your requirements change.

- With the money you retain by not purchasing, you can keep it to ease your cashflow and earn interest – preserving the cash in your business or keeping your overdraft at a manageable level.
- The rental charge does not change over the period. Therefore, you can budget accurately knowing what outgoings are planned for your business.
- Rental does not involve any leasing agreements and does not incur any interest payments. There is no collateral risk to you as Cool Energy rent to you direct and own the equipment.
- Your rental kit will not grow old - we will replace it every 2 years on longer term rental.

Our Rental Range

Air and water cooled chillers

- Dry air coolers
- Cooling towers
- Air handling units
- Chilled fan coils
- DX air conditioning
- Portable air conditioners
- Heat pumps
- Portable heating packages

You can choose the correct equipment from our fleet to accurately match your application requirements and on-site demands. We have a wide range of kit including air and water-cooled chillers with the latest energy-efficient technology.

You can rent for as long as you require. You choose for how long you want to rent as your requirements may change in six months or even longer. We encourage you to be flexible to help your business.

- Cool Energy keep a minimum of 100 chillers in stock at any one time – so immediate delivery could be achieved to suit your timescales.
- We can offer you a purchase price after your rental with us should you require this option.

**All rentals include maintenance.
You pay no additional charges.**
