

Did you know...

You can rent portable cooling towers from Cool Energy

Need a cooling tower fast or for a planned outage or refurbishment?

No problem. Cool Energy, in partnership with worldwide specialists EVAPCO, have a range of portable cooling towers ready for immediate rental.

Our service and manufactured product is designed to meet all local **HSE** and **Water Treatment** requirements based on **ACoP L8 standards**.

Our engineers can work with your site engineers and services to ensure that the equipment delivered to your business is applied and resilient to manage your specific application and site controls.

Do you have a planned tower refurbishment or need additional capacity to meet increased production targets?

Then please contact us free on **0800 840 4210** or on **info@icstemp.com**.

Rental Cooling Towers from Cool Energy

500kW - 20,000kW Installations

When you may need to rent from Cool Energy

If you have a cooling tower, there are times when the inner core will need to be replaced.

We can keep you on-line and your production or HVAC equipment operating constantly by supplying a temporary unit during these works.

We also rent cooling towers in the following instances:

- **During breakdowns and equipment failures.** Cool Energy can either provide you with a **Cooling Tower** or a Water-Cooled rental chiller to meet your load conditions and temperature set-point.
- **Providing Additional Capacity.** There may be times when you need to increase production or have an ambient related bottleneck. You can rent in one of our units to solve your problem.
- **No Capital for replacement.** Cool Energy can provide Cooling Tower packages from 500kW all the way through to multi mega-watt systems for long or short term budgeting needs.

We also specialise in the following rental equipment:

- **Air Cooled Rental Chillers**
- **Dry Air Blast Coolers/Fin Fans**
- **Air Handling Units (Roof Top and Internal)**
- **Fan Coils (Sever Room and Air Conditioning)**
- **DX Air Conditioning**
- **Portable Air Conditioning and Heating**
- **Boilers and Heat Pumps**
