

R22- A Rental Solution From Cool Energy

R22 The Facts

- > No new equipment containing R22 can be sold to businesses in the UK and Europe.
- > The use of virgin HCFC's to re-gas or repair R22 equipment is now banned.
- > From 1st January 2015 it will be illegal to use any HCFCs to service RAC equipment - so recycled or reclaimed HCFC may not longer be used.

Over the past
3 years the cost
of R22 has risen
5 fold.

Need to change a chiller
or having a retrofit?

Does your system still operate with R22 gas? We can Help. We can explain your options, the facts about R22 and how we can help you comply with new legislation.

Cool Energy can provide you with a chiller package during your R22 chiller replacement or retrofit and offer you a long term chiller package should you not have the funds to currently replace your chiller.

Call us free on 0800 840 4210 and we will ask one of our local engineers to visit you on the same or next day for a free site survey. We also offer equipment on standby as a contingency.

We have offices and depots in the following locations: 3 in London (Kingsbury, Epsom, Dagenham), Southampton, Bristol, Birmingham, Manchester, Bradford, Glasgow and Dublin.

Cool Energy are providing advice to customers regarding the banning of the HCFC refrigerant gas R22 under EU legislation.

We can guide you through the options available and keep you covered during any system replacement or downtime. We have a large fleet of rental chillers, all with complete service throughout the rental period.

STEP 1

Look to see if you have R22

Most equipment has a label or plate on the outside providing the specification of the equipment and CE registration. If this is not present, then each compressor contained within the equipment will have this identification.

STEP 2

The Facts - Act Early

- Under EU Ozone regulation EC2037/2000 **no new R22** equipment containing R22 can be sold to businesses in the UK and Europe.
- The use of R22 virgin gas to re-gas or repair and maintain your R22 equipment is now prohibited.
- **From 1st January 2015** it will be illegal to use any HCFCs to service RAC equipment – so recycled or reclaimed HCFC may not longer be used.

STEP 3

See How Cool Energy can help you

We have experience in managing the phase-out of R22 within the industry and can help in the following manner:

- Come to site and help identify what R22 equipment is currently on site.
- Help provide a contingency plan in case of breakdown or changeover, so that the site is fully prepared.
- Provide a rental chiller or cooling plant during any maintenance, change out or refurbishment of R22 equipment, to ensure a smooth transition.
