

Emergency Chiller Rental Service

Cool Energy has launched a new rental service offering specialist breakdown cover to its customers who have an emergency on site.

The newly launched service, which offers a **same day response** and visit to site by one of its team of mobile application engineers guarantees a **timed delivery** of equipment to site with an installation team, to help safely manage the breakdown.

Fast Emergency Response

Russell Wilson, Cool Energy's Rental Director explained, "We are aware that some of our customers need a faster response to their breakdowns and someone on site capable of managing their emergency on site to avoid any loss to their business.

This can be varied, from air conditioning failure in a data storage suite, to a component fault on cooling equipment in a manufacturing plant.

All downtime is expensive and has a knock-on effect throughout the business and we are acutely aware of the impact. That is why we are finely tuning our service package and operation to the needs of our customers," stated Wilson.

Wide Coverage and Product Range

Cool Energy, who operate throughout the UK, Ireland and Europe offer a wide range of cooling and heating rental plant, including chillers as small as **1kW** all the way through to **1,000kW** single units, air blast coolers, cooling towers, air handling units, fan coils, boilers, heaters and air conditioners on a same or next day basis.

Cool Energy can deliver units on a same or next day basis.

They also supply bespoke installations alongside the supply of flexible water hoses, pipework connections, heat exchangers and power generators.

Cool Energy provide 24/7 maintenance throughout the rental period.

All of this is supplied with 24/7 maintenance throughout the rental period. There is also an option to purchase the equipment when customers have completed their rental project.

Call us free on **0800 169 3861** for an emergency visit or to order equipment fast.
