

Need a chiller? No capital funds?

“We can help you by providing a new chiller with small monthly payments to help increase your cash flow.” Russell Wilson, Cool Energy Rentals Director.

Cool Energy has launched a new rental service offering brand new equipment to customers who currently have no funds for projects, but need equipment to fulfil their plans in 2009.

The newly launched service, which offers chillers as small as **1kW** all the way through to **1,000kW** single units, includes the latest energy saving screw, scroll and Turbocor compressors.

Using Rental to free capital

Russell Wilson explains, “We are aware that some of our customers do not currently have the funds or capital plus the certainty in their business at present to commit to large investments.

Russell Wilson - Cool Energy Rental Director

We are offering a range of new and ex-demo units available on a monthly, annual and longer term, for those customers who can't plan ahead and want to keep their cash in the bank.

Some of our customers have also chosen to rent from us for the first 6 months of the year to help with their cash flow, and then make a decision on what they want to do later on in the year.

This way, they can keep a hold of their capital and can offset their rental payments against their corporation tax payments where applicable,” commented Wilson.

Wide Coverage and Product Range

Cool Energy, who also operates in Ireland and Europe, rent air and water-cooled chillers, air blast coolers, cooling towers, air handling units, fan coils and air conditioners throughout the UK and Europe.

They also install their equipment where needed and supply flexible water hoses, pipework connections, heat exchangers, power cable and generators.

Cool Energy can deliver the same or next day

All rentals include 24/7 maintenance throughout the period on site, and there is an option to purchase the equipment when funds are available.

Cool Energy can be contacted on 0800 169 3861 or via email on info@coolenergy.co.uk
